Web Application Vulnerability Assessment & Penetration Testing

Jul 2025

- Conducted Web Application VAPT to identify and mitigate critical security flaws.
- Developed encryption utilities and packet analyzers across 12 practical security tasks.

Prodigy Infotech

Chennai

Cyber Security

Aug 2024

- Implemented cryptographic algorithms and system-level security utilities.
- Built a packet analyzer for network traffic inspection and security testing.

PROJECTS

MultiClips

GitHub: [Repository Link](#)

- Engineered a native macOS clipboard manager utilizing **Swift** and **SwiftUI** to efficiently monitor, capture, and organize system-wide clipboard events.
- Architected a responsive, adaptive interface with custom **SwiftUI animations**, ensuring seamless background execution and user interaction.
- Integrated **SwiftData** for robust local data persistence, optimizing the storage, retrieval, and state management of extensive clipboard history.

GPACALC

GitHub: [Repository Link](#)

- Developed a dynamic academic utility application using **SwiftUI** to accurately compute and track semester-wise GPA and CGPA.
- Implemented efficient local data storage utilizing **SwiftData** to maintain persistent academic records, enabling real-time edits and state recalculations.
- Designed a modular component architecture to optimize rendering performance and ensure a highly responsive, student-friendly user experience.
